

LE THI PHUONG ANH

Product Manager with 3+ years of experience building digital products across platforms. Skilled at defining product problems under ambiguity, translating user insights into product outcomes and leading cross-functional teams to deliver high-impact solutions. Passionate about building products that create meaningful real-world impact.

PRODUCT MANAGER

One Mount *(OneHub - a real estate co-brokerage platform)* 12/2025 - Present

- **Product discovery**
 - Co-led discovery by conducting user interviews, then mapped the end-to-end property sales journey and designed the core flow by translating user and operational insights into product requirements, reducing design-to-spec turnaround by ~20% through clearer discovery documentation.
- **Cross-functional collaboration**
 - Orchestrated 3 design and engineering squads (+10 members each) to define platform features and their underlying architecture, enabling the platform to support 3 concurrent agent workflows.

PRODUCT MANAGER

Herond Labs *(Herond Wallet - a multi-chain crypto wallet)* 09/2024 - 07/2025

- **Product strategy & problem discovery**
 - Conducted interviews across user segments to map behavioral barriers in crypto adoption and identified onboarding drop-off as the #1 acquisition blocker for Web2 users; led the Keyless Wallet initiative eliminating seed phrase management, reducing new user setup time by ~30%.
 - Defined quarterly roadmap across 12 initiatives, prioritized by user impact and business growth metrics.
 - Shaped the GTM approach for Keyless Wallet, aligning onboarding, product message and adoption goals for Web2 users entering Web3.
- **Product development & execution**
 - Coordinated 2 Agile squads (10+ members each) delivering multi-chain wallet and investment platform features across mobile & web platforms to ensure successful product rollouts.
 - Translated ambiguous product challenges into structured feature requirements and execution plans balancing user needs, business goals and technical constraints.

PRODUCT OWNER

Gianty Vietnam *(Nobinobi - an e-commerce platform)* 02/2024 - 07/2024

- **Product discovery**
 - Analyzed buyer and seller behaviors to identify critical friction points in core workflows, prioritizing fixes that contributed to a 22% improvement in task completion rate.
 - Led design and engineering teams to prototype and validate product improvements aimed at increasing platform engagement.
- **Product delivery**
 - Owned backlog management and sprint planning to ensure development priorities aligned with business impact and technical feasibility.
 - Defined user stories and acceptance criteria, translating business requirements into actionable development tasks.
 - Partnered with business teams to align product improvements with platform growth and seller acquisition initiatives.

Skilled at defining product problems under ambiguity, translating user insights into product outcomes and leading cross-functional teams to deliver high-impact solutions. Passionate about building products that create meaningful real-world impact.

PRODUCT OWNER

Medigo Software (Medigo - a healthcare platform)

04/2023 - 01/2024

• Product development

- Led feature development for 2 core modules on a healthcare platform, improving service accessibility for 100+ pharmacy and clinic partners.
- Translated healthcare service workflows into +5 digital product features that improved accessibility and user experience.

• Product analytics & iteration

- Monitored product performance and user feedbacks to guide iterative improvements and ensure operational reliability.
- Maintained structured backlog management and documentation to support efficient product delivery.

SENIOR QUANTITATIVE RESEARCH EXECUTIVE

Ipsos Vietnam

12/2021 - 12/2022

• Analysis & consultancy

- Conducted market and consumer research across multiple industries, analyzing quantitative data to uncover actionable insights that informed product optimization, pricing and user engagement strategies
- Delivered data-backed recommendations that improved clients' business and marketing decisions

• Project & client management

- Managed multiple research projects through full lifecycle from scoping, data validation, stakeholder alignment to final reporting
- Coordinated with regional and local teams across marketing, analytics and operations to ensure smooth execution under tight timelines
- Mentored junior executives, improving delivery efficiency and analytical expertise across the team

SENIOR QUALITATIVE RESEARCH EXECUTIVE

Kantar Vietnam

09/2019 - 11/2021

• Analysis & consultancy

- Designed and moderated focus groups and in-depth interviews, analyzing qualitative data to understand user behaviors, motivations and product usability
- Delivered actionable insights for clients in FMCG, entertainment and digital products, shaping concept & product testing, feature design and brand communication strategies

• Project & client management

- Acted as a strategic liaison between clients and internal research teams to ensure alignment between user insights and business objectives
- Managed multiple projects under operational constraints, balancing timelines with analytical depth and data quality
